SECTION 4: First aid measures

4.1. Description of first aid measures

General information Get medical attention if symptoms are severe or persist. Remove affected person from source of

contamination.

Inhalation Unlikely route of exposure as the product does not contain volatile substances. Move affected person to

fresh air and keep warm and at rest in a position comfortable for breathing.

Ingestion Never give anything by mouth to an unconscious person. Do not induce vomiting. Promptly get affected

person to drink large volumes of water to dilute the swallowed chemical. Give milk instead of water if

readily available. Get medical attention immediately.

Skin contact Wash skin thoroughly with soap and water. Remove contaminated clothing. Get medical attention

promptly if symptoms occur after washing.

Eye contact Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Get

medical attention immediately. Continue to rinse.

4.2. Most important symptoms and effects, both acute and delayed

General information The severity of the symptoms described will vary dependent on the concentration and the length of

exposure.

Inhalation Irritation of nose, throat and airway.

Ingestion May cause chemical burns in mouth and throat. May cause stomach pain or vomiting. Nausea, vomiting.

Diarrhoea. Ingestion of large amounts may cause unconsciousness.

Skin contact May cause skin irritation.

Severe irritation, burning and tearing. Corneal damage. May cause blurred vision and serious eye Eve contact

damage.

4.3. Indication of any immediate medical attention and special treatment needed

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water

fog. Use fire-extinguishing media suitable for the surrounding fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards Oxygen released in thermal decomposition may support combustion. Contact with combustible material

may cause fire. Containers can burst violently or explode when heated, due to excessive pressure buildup. May explode when heated or when exposed to flames or sparks. Severe explosion hazard when vapours are exposed to flames. May form toxic or explosive vapours in presence of certain metals.

Hazardous combustion products Does not decompose when used and stored as recommended. Thermal decomposition or combustion

products may include the following substances: Oxygen.

5.3. Advice for firefighters

Protective actions during

firefighting

Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify

appropriate authorities.

Special protective equipment for

firefighters

Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions Wear protective clothing as described in Section 8 of this safety data sheet.

6.2. Environmental precautions

Environmental precautions Spillages or uncontrolled discharges into watercourses must be reported immediately to the

Environmental Agency or other appropriate regulatory body.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Provide adequate ventilation. Absorb spillage with non-combustible, absorbent material. Eliminate all

sources of ignition. No smoking, sparks, flames or other sources of ignition near spillage. Flush contaminated area with plenty of water. Inform authorities if large amounts are involved.

6.4. Reference to other sections

Reference to other sections Wear protective clothing as described in Section 8 of this safety data sheet. See Section 11 for additional

information on health hazards. See Section 12 for additional information on ecological hazards. For waste

disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions Handle all packages and containers carefully to minimise spills. Keep away from heat, sparks and open

flame. Provide adequate ventilation. Wear suitable protective equipment for prolonged exposure and/or high concentrations of vapours, spray or mist. Avoid contact with skin and eyes. Avoid contact with the

following materials: Acids. Moisture. Oxidising agents. Reducing agents.

Advice on general occupational

hygiene

Do not eat, drink or smoke when using this product.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions Keep away from flammable and combustible materials. Protect against physical damage and/or friction.

May attack some plastics, rubber and coatings. Store in tightly-closed, original container in a dry, cool and

well-ventilated place.

Storage class Oxidiser storage.

7.3. Specific end use(s)

Specific end use(s) The identified uses for this product are detailed in Section 1.2.

8.2. Exposure controls

Protective equipment

Appropriate engineering controls

Provide adequate ventilation if the airborne contamination exceeds occupational exposure limits

Eye/face protection Safety glasses with side-shields (EN 166).

Hand protection Chemical resistant PVC/Nitrilrubber gloves (to European standard EN 374 or equivalent).

Thickness: 0,4 mm. Penetration time: >480 min (level 6). The selection of specific gloves for a specific application and time of use in a working area, should also take into account other factors on the working space, such as (but not limited to): other chemicals that are possibly used, physical requirements (protection against cutting/drilling, skill, thermal protection), and

the instructions/specification of the supplier of gloves.

Other skin and body protection

Wear suitable protective clothing (EN14605)

PERO Destainer

Hygiene measures Do not eat, drink or smoke when using this product.

Respiratory protection Respiratory protection must be used if the airborne contamination exceeds the recommended

occupational exposure limit. In the case of dust or aerosol formation, use respirator with an approved

filter. Recommended Filter type: ABEK-P2

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance Clear liquid.

Colour Colourless.

Odour Characteristic.

pH (concentrated solution): 2-3

Melting point 0°C

Initial boiling point and range 100°C @ 760 mm Hg

Vapour pressure 18 hPa @ 20°C

Vapour density ~ 1.20

Relative density 1.02-1.08 @ 20°C

Solubility(ies) Miscible with water. Soluble in the following materials: Ether.

Partition coefficient log Kow: -1.57

9.2. Other information

Molecular weight 34.02

SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity The following materials may react with the product: Acids. Alkalis. Organic peroxides/hydroperoxides.

Organic salts. Oxidising materials. Strong reducing agents. Organic compounds. Some metals.

10.2. Chemical stability

Stability Avoid the following conditions: Heat, sparks, flames. Shocks and physical damage. Moisture. Light. Avoid

contact with alkalis. Avoid contact with flammable/combustible materials.

10.3. Possibility of hazardous reactions

Possibility of hazardous reactions Will not polymerise.

Contact with combustible material may cause fire

10.4. Conditions to avoid

Conditions to avoid Avoid heat, flames and other sources of ignition.

10.5. Incompatible materials

Materials to avoid Alkalis - inorganic. Strong reducing agents. Massive, solid metal. Powdered metal. Organic compounds -

aliphatic. Organic - alicyclic. Organic compounds - aromatic. Organic - polycyclic. Organic - heterocyclic. Organic - organometallic. Flammable/combustible materials. Hydrocarbons - halogenated. Organic salts.

Organic nitro compounds.

10.6. Hazardous decomposition products

Hazardous decomposition

products

Rapid decomposition will release large quantities of oxygen (health and fire risk). Decomposition is exothermic causing temperature rise which will further increase the rate of decomposition creating explosive situations. On decomposition irritating gases, vapours and oxygen are released.

Decomposition will not occur if product is stored and used correctly.
